From the fibre to the construction of the woven fabric the hightechnical article Mediatex® BERMUDA has been developed for high mechanical strain. Mediatex® BERMUDA is resistant to all tensile stress which may occur in different applications and prevents quick tearing or tear propagation during handling. Mediatex® BERMUDA is onesided coated with a special polymer which allows in combination with solvent ink a highly brilliant print at lowest ink wastage. In case of outdoor applications the material has to be fixated at all edges (should not work against itself and other objects) and not to handle and treat under temperature of 5 degree celsius.

Mediatex® BERMUDA is tested with the following printers:  
 AGFA • Mimaki • Mutoh • Roland • Vutek •  
 Scitex • Seiko • HP 9000 • Nur • OCÉ • HP-Latex-  
 Printer (see HP Media Finder) • etc.  
 Please see for yourself at a test.
