

NAZDAR[®] 55 Color Separation Series Digital Imaging Inks are dye based black inkjet inks for use in Epson Printhead Technology Digital printers. These purpose built inks are engineered for producing screen print film positives at much higher Ortho and UV densities than the standard pigmented photo inks. The primary features of these inks are as follows:

- High intensity black with a high UV density value for maximum UV light adsorption
- Wider exposure latitude on screen exposure units
- Excellent ink performance and resolution on a variety of exposure films
- Can print at higher speeds compared to using pigment inks.
- Lower running costs through the use of no color ink cartridges in the other ink channels

PRINTER MODELS

Epson Stylus Pro 4000, 4800, **4880***
Epson Stylus Pro 7600, **7700***, 7800, 7880, **7890***
Epson Stylus Pro 9600, **9700***, 9800, 9880, **9890***
* Currently available models

SUBSTRATES

Recommended for use with all standard film positive products

USER INFORMATION

While technical information and advice on the use of this product is provided in good faith, the User bears sole responsibility for selecting the appropriate product for their end-use requirements. See full disclaimer at the end of the document.

**INK
CHANGEOVER**

The inks should only be installed on new machines that have not had original inks installed previously. These inks can also be used on Epson 4000, 7600 and 9600 dye based printers but the existing inks should be flushed out using cleaning cartridges before installing the inks.

CLEAN UP

Use soap and water for cleanup of all ink spills.

STORAGE

Store ink and cleaning solutions at 77°F (25°C) or below. All water based products should be protected from freezing at all times. Ink and cleaning solutions should always be kept away from heat, sparks, and flames. If stored at a different temperature, the ink should be allowed to reach room temperature before calibration or printing. Recommended shelf life of this product is 18 months from the date of manufacture when stored under preferred conditions.

GENERAL INFORMATION

INK HANDLING

All personnel mixing and handling these products must wear gloves and eye protection. Clean up spills immediately. If ink does come in contact with skin, wipe ink off with a clean, dry, absorbent cloth (do not use solvent or thinner). Wash the affected area with soap and water. Consult the Nazdar[®] Color Separation Series Material Safety Data Sheet for further instructions and warnings.

DURABILITY

All film positives should be stored in a dark and dry environment to minimize fading over long periods of storage.

PRODUCT OFFERING – Bulk Ink

PACKAGING All colors listed below are available in one liter containers.

Stock Number	Standard Printing Colors
LPASCRSEPKK	Piezo Color Sep Black
LPAQIBSSNC	Piezo NCI Sep Clear
