DRYING RACKS

Our **Drying racks** feature 60 racks of 70 x 100 or 85 x 125 cm and offer the advantage of minimum overall floor dimensions.

The stiff and monobloc frame is manufactured with welded iron profiles.

This equipment rests on four rubber pivoting wheels with a double row of balls for an easy movement even when it is full loaded.

The racks are made of welded iron thread protected by zinc plating.

An original design of the guides provides a perfect locking which avoids lapping and twisting of the shelves.

Two return springs allow the stand in up-right position of each rack. The 2,5cm standard interval which separates them in the lower position has been studied to obtain a better air circulation, and consequently a better drying. Furthermore, allied with the rack rigidity, that interval eliminates any risk of blotting with the last printed item when the next rack is loaded.

For oven drying, we offer in the same sizes, 70 x 100 and 85 x 125 cm, trolleys mounted with wast iron wheels. They exist with 31, 52 or 60 racks.

On request, we offer special trolleys and drying racks :

- 5 cm spacing (30 racks maxi, for items of maxi thickness 4,1 cm)
- 7,5 cm spacing (20 racks maxi, for items of maxi thickness 6,6 cm)
- number of racks on demand, within the limits indicated hereunder:
 - 60 for a standard rack or trolley
 - 30 for a standard rack or trolley with 5 cm spacing
 - 20 for a standard rack or trolley with 7,5 cm spacing.
